P5027

ED-DC1224-10

- High efficiency & long life.
- Easy to install.
- Transient, short circuit, over-voltage & over temperature protected.
- Multiple ED series units can be installed to modify overall output.
- P5027M model features radio memory function.
- NG/REC models encapsulated for enhanced resistance to vibration and humidity.
- Select models supplied with an LED status indicator.
- 2 or 5-year warranty.

Isolated Voltage Converter

Isolated voltage converters (also known as Galvanic Isolated) provide full dielectric isolation (no electric contact) between input and output circuits by means of a high frequency converter, which may be a safety requirement for certain applications.

Isolated units also have strong noise and interference blocking capabilities thus providing a cleaner DC source for sensitive loads.

Typical applications requiring isolated voltage converters are – Communications, Entertainment & Navigation Systems, Forklifts etc.

Voltage Converters – Galvanic Isolation

- AS/NZ 4763-2011 approved portable inverter.
- Pure sine wave output.
- RCD switch with M.E.N. for improved workplace safety.
- High surge capacity.
- Transient, short circuit, over-voltage & over temperature protected.
- Audio alarm & warning/error codes for easy diagnosis.
- Remote switch panel included.
- Ideal for telecommunication, emergency, council vehicles, caravan, camper trailer & marine applications.
- 5-year warranty.

ED-IV1012R

Input Voltage : 10.5–15.5VDC
 AC Output : 230VAC 50Hz
 General Power Outlet : 2
 Cable Length : Remote Panel 6m

Pure Sine Wave

Pure sine wave inverters produce current that is close to grid AC output.

There are many advantages to pure sine wave inverters over others:

- Reliably powers devices that will not work with modified sine wave inverters.
- Very low harmonic distortion and clean power similar to utility supplied electricity.
- Inductive loads like microwaves and motors run faster, quieter and cooler.
- Reduces audible and electrical noise in fans, fluorescent lights, audio amplifiers, TV, fax and answering machines.
- Prevents crashes in computers, weird print outs and glitches in monitors.

ED-3REM

ED-BC4012

- Selectable outputs for different battery types.
- 4 stage charging controls:
 - Bulk.
 - Absorption.
 - Float.
 - Maintenance.
- Output current controlled via front keypad.
- Priority charge function on bank 1.
- Selectable Night Mode for silent operation.
- Optional LCD panel for remote control and monitoring.
- Transient, short circuit, over voltage & over temperature protected.
- 12V & 24V models available.
- 5-year warranty.

Input Voltage : 90–265VAC
Frequency : 50–60Hz
Output Circuits : 3*
Battery Types : Flooded, Lithium, AGM/GEL
Approvals : C-Tick, AS/NZS 60335.2.29
Operating Temperature : -20°C to 60°C
**1 fully independent, 2 common with diode isolation*

RPS3800	15 – 17.4	90 – 125 / 200 – 240	0 – 24*	1.1

* User selectable.

- Integrated accelerometer for pitch & roll measurements.
- 3 stage configurable warning and alarm.
- Internal buzzer.
- Multi-voltage.
- Full colour display.
- Compact size.
- Made in Australia.

Voltage : 9-36V
 Body : ABS
 Connector : 1.9m lead to cigar plug
 Weight : 90g
 Approvals : CE, C-Tick
 Operating Temperature : -40°C to 85°C

Pitch & Roll

Digital inclinometer incorporates a 3 stage visual and audible warning for a vehicle's pitch and roll, each warning stage can be user configured.

Stage 1 – Green
 Safe Range, no alarm.

Stage 2 – Yellow
 Slow beeping.

Stage 3 – Red
 Fast beeping.

Digital Inclinometer

Part No.
HMDS0400

Supplied with mounting bracket and hardware.

Made in Europe

5Yrs

7V
70V

- Complete battery status information at a glance (% , V , A , Ah , W , h:m , °C).
- Supports up to three battery banks (12V, 24V and 48V).
- Very simple 'Plug and Play' installation.
- Programmable alarm contact.
- All wiring included (excluding battery cables).
- Compatible with lead based and lithium batteries (LiFePO4).
- The inputs for battery bank 2 and 3 can also be configured for other purposes – keyswitch input, mid-point voltage measurement, setup lock or backlight control.
- Measure DC currents up to 600A (500A continuous) and voltages up to 70VDC.
- 5-year warranty.
- Made in Europe.

Supply Voltage :		7-70VDC
Input Voltage :	Main Battery	7-70VDC
	Auxiliary Battery(s)	1-70VDC
Current :		10mA @ 12V
Battery Capacity :		10-10,000Ah
Approvals :		CE
Operating Temperature :		-20°C to 50°C

Battery Monitor Plus Kit

Part No.

ED-EN55050

Kit contents:

- 1 x Control & Display Unit (CDU)
- 1 x Intelligent Shunt Module
- 1 x Fused supply cable
- 1 x Shunt to CDU cable

- 6 x Rubber port blanks
- 1 x User manual
- 1 x Installation guide

Control & Display Unit

(actual size)

Large circular bar graph clearly shows battery charge at a glance. Smart display animations indicate whether the battery is being charged or discharged and by which intensity.

Simple three button interface allows easy parameter readout selection in normal operating mode and intuitive navigation through the setup menus.

Compact round Control & Display Unit with splash proof front panel, large backlit display and only 36mm installation depth.

Permanent large digit battery state of charge (%) indicator.

Second parameter row allows an additional parameter to be shown. During setup, this row will also show a clear textual explanation of each function.

Normal operating mode (second parameter row disabled).

Second parameter row can display:

- Volts
- Amperes
- Watts
- Maintenance hours
- Temperature
- Ampere hours
- Time remaining

Alarm icon and scrolling explanation. An audible alarm can also be enabled.

Scrolling text clearly explains functions during setup.

Intelligent Shunt Module

Special fiber reinforced base material offers excellent high temperature properties, good chemical resistance and high strength.

Voltage sense input for (main) battery bank 1. Also positive supply input for ePRO Plus.

Voltage sense inputs for battery banks 2 and 3. Or assignable to other functions.

Potential free 5A/30VDC (1A/70VDC) programmable alarm relay contact to control external equipment.

Stainless steel studs, nuts and washers for optimal corrosion resistance.

Ultra low loss custom made shunt module can handle 500A continuously.

Dual QLINK port for connection to the Control & Display Unit or other accessories.

Input port for optional battery temperature sensor.

Multi purpose indicator provides status, error and battery charge information (3 colours).

IHM01

SY15186

- Sealed case.
- Multi-voltage.
- Transient voltage & reverse polarity protected.
- IHM01 aluminium bezel.
- 6 digit display.
- Running indicator.
- 4mm numeral height.
- Shock & vibration resistance.
- Quartz accuracy.
- Made in North America.
