

Displays / HMI

- Flexible CAN integration – configurable to any CANopen or J1939 protocol (multiple baud rate).
- Buttons feature multiple illumination effects. User's can program each ring to either blink, ripple, spin or fade in one or more colours.
- Dimmable illumination.
- LED backlit icons.
- Switch inserts can be laser etched.
- Low current draw.
- TE DEUTSCH compatible connector.
- Environmentally sealed – IP68.
- Made in North America.

ESW-00108

ESW-00203

PowerKey Keypads

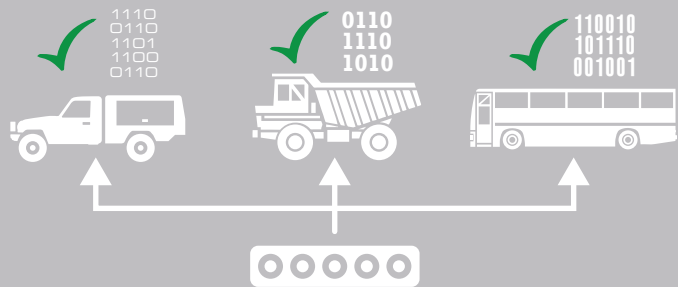

Operational Voltage : 9–32V
 Max. Current Draw : 65mA @ 13.8V
 CAN : CANopen, SAE J1939
 Construction : Silicone
 Ingress Protection : IP68
 Operating Temperature : -40°C to 85°C

9V 32V IP68 Made in North America

CANopen & J1939 Compatible

The PowerKey Keypads feature CANopen & SAE J1939 protocol compatibility, allowing them to be integrated into almost every multiplexed system on the market today.

- Greater flexibility
- Suits most systems on the market today
- Selectable baud rate (communication speed)

Laser Etched Inserts Available

PowerKey Keypads – Accessories

Part No.	Description
CONNKIT-CANKEYPAD	Connection kit. Suits all PowerKey Keypads
101-00296-016	Switch Insert – Black
101-00296-017	Switch Insert – Red
101-00296-018	Switch Insert – Green

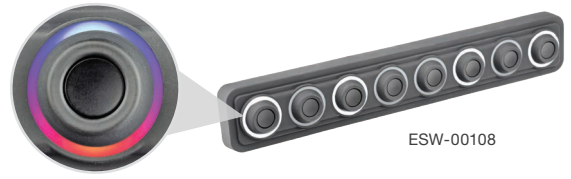

Displays / HMI

ESW-00102L

ESW-00102L features 3 individually controlled multi-coloured LEDs. Programmable to illuminate to user's requirement, e.g. level gauge indicator, mode select.

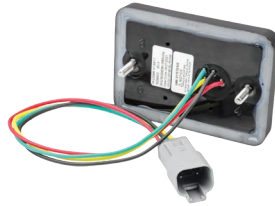

ESW-00108

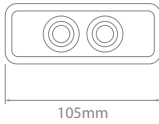

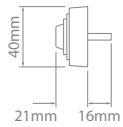

All PowerKey Keypads feature multiple illumination effects. User's can program each ring to either blink, ripple, spin or fade in multiple colours.
