Isuzu Isolator Kits

- Delayed isolation to protect AdBlu/Urea pump during DPF cooldown.
- Custom programmed CAN controller suiting Isuzu DB6A and non DB6A engine types.
- EGIS Voltage Sensing Relay (E8710-1500) with 500A continuous capacity.
- Manual override lever on EGIS relay.
- Universal mounting bracket allows flexibility in component orientation and mounting options.
- Microplex CAN controller seals to IP67 with holder kit.

Mounting Bracket :	Powder Coated Steel
EGIS Voltage Sensing Relay :	
Voltage :	8-36V
Current Rating :	Continuous 500A
	Intermittent 1600A
Ingress Protection :	IP67, IP6K9K
Operating Temperature :	-40°C to 105°C

Kit Contents

ESW-ISO-IS01 - 22 minutes

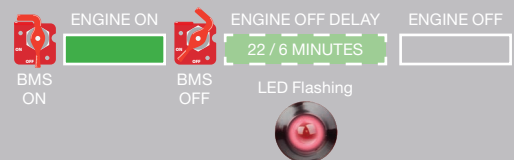

ESW-ISO-IS02 - 6 minutes

BMS and Warning Panel can be oriented to suit application

Engine Isolation Delay

Isuzu Isolator Kits

Part No.	Suits	Isolation Delay
ESW-ISO-IS01	DB6A Engines only	22 minutes
ESW-ISO-IS02	Non DB6A Engines only	6 minutes
