Switches

CAN Handbrake Alarm Kit

- Handbrake alarm kit providing alert when the driver's door is open and the handbrake is not engaged.
- Twin stage output. Stage 1 is immediate and Stage 2 has a 6 second delay.
- Suits Isuzu N-Series trucks.
- Utilises the non-intrusive Contactless CAN Adaptor to access OEM signals.
- Custom-programmed Microplex CAN controller powers the system's functionality.
- Heavy duty disc horn for reliable audible alerts.
- Holder kit specifically designed for Microplex CAN controller.
- Includes high beam output.

Microplex CAN Controller :

Current Draw :	36mA @ 24V

Disc Horn :

Voltage :	24V
Terminal Size :	6.3mm Blade
Frequency :	High (420 Hz)
Sound Pressure Level :	110 dB(A) @ 1m

Kit Contents

Disc Horn (D2H24)

Microplex CAN Controller (ESW-00049)

x 14 x 12

Microplex Holder Kit (FH601-KIT)

Contactless CAN Adaptor (ESW-00050)

Mini Relay (PB1524R)

x 5

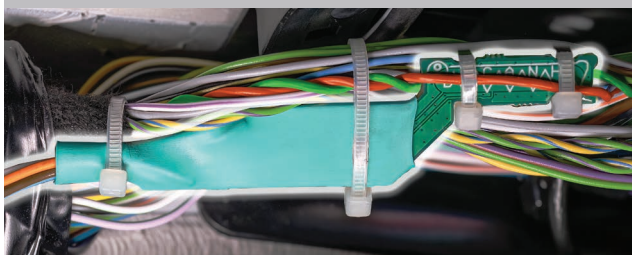

Mini Relay Base Kit (P-PRBC)

Seamless CAN Data Retrieval

The Contactless CAN Adaptor reads the electromagnetic field when the CAN signal passes through the original insulated wires.

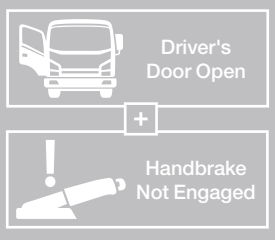

It generates digital output signals that mirror the data packets transmitted on the connected CAN bus.

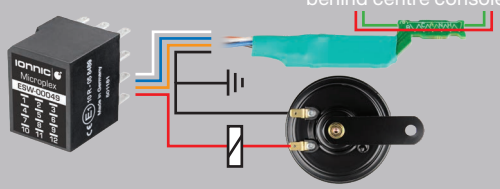

The contactless reader provides CAN messages from the Isuzu on the status of the driver's door and handbrake.
